CAREER SUMMARY:

Backend-focused Computer Science student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Backend Development. Experienced in building RESTful APIs using Node.js and Express with MongoDB and MySQL. Comfortable debugging applications, designing clean modular code, and solving algorithmic problems. Passionate about building scalable software systems and continuously improving code quality.

SKILLS:

- **LANGUAGES:** JAVA, C++, JAVASCRIPT, PYTHON, SQL
- **WEB TECHNOLOGIES:** HTML, CSS, JAVASCRIPT, REACT.JS
- **BACKEND DEVELOPMENT:** NODE.JS, EXPRESS.JS, REST APIS, AUTHENTICATION, SESSION MANAGEMENT, MVC ARCHITECTURE
- **DATABASES:** MONGODB (NOSQL), MYSQL (RDBMS)
- **CORE COMPUTER SCIENCE:** DATA STRUCTURES & ALGORITHMS, OBJECT-ORIENTED PROGRAMMING, OPERATING SYSTEMS, DBMS, COMPUTER NETWORKS
- **TOOLS & TECHNOLOGIES:** GIT, GITHUB, DOCKER, LINUX/UNIX, POSTMAN
- **CONCEPTS:** PROBLEM SOLVING, DEBUGGING, API DESIGN, PERFORMANCE OPTIMIZATION, CACHING FUNDAMENTALS

PROJECTS:

- **Assignment Approval Management**
 - Developed a role-based web application to streamline assignment submission and approval workflows for Students, Professors, HODs, and Admins.
 - Engineered RESTful APIs using Express.js to manage assignment submission, approval, rejection, and workflow status tracking.
 - Implemented Role-Based Access Control (RBAC) to secure application modules and restrict user actions based on permissions.
 - Designed scalable MongoDB collections and CRUD operations for managing assignments, departments, and user records.
 - **Tools/Tech:** Node.js, Express.js, MongoDB, HTML, CSS, EJS, REST APIs, RBAC
- **To-Do List Web Application**
 - Developed a full-stack task management application with CRUD functionality and RESTful APIs for efficient task creation, updates, and deletion.
 - Integrated MongoDB for persistent data storage and designed a modular backend architecture to improve scalability and maintainability.
 - **Tools/Tech:** Node.js, Express.js, MongoDB, HTML, CSS, REST APIs
- **Plant Disease Detection using CNN**
 - Developed a CNN model to classify potato leaf diseases into Healthy, Early Blight, and Late Blight.
 - Performed image preprocessing, data augmentation, and model evaluation to improve prediction accuracy.
 - Integrated the trained model with a web interface for real-time disease prediction.
 - **Tools/Tech:** Python, TensorFlow/Keras, OpenCV.

EDUCATION:

BACHELOR OF ENGINEERING (B.E.) – COMPUTERSCIENCE
CHITKARA UNIVERSITY, HIMACHAL PRADESH
CURRENT CGPA: 8.47

2023 – 2027
